STAR[®] Network Encoder MTU

METER TRANSMISSION UNIT

The STAR Network encoder MTU makes meter reading more efficient and allows for reduced costs, improved billing, and managed resources.

The MTU transmits accurate meter readings on defined schedules. Its powerful, narrow-band transmitter broadcasts over FCC-licensed, 450- to 470-MHz radio frequencies. The device works with encoder-register water meters that provide electronic output.

Each STAR Network Encoder MTU delivers

Long-lasting performance

Contains a 15-year permanent battery

Secure and reliable technology

Ensures data and system security

Long-range power

Transmits meter data over a range of at least one mile

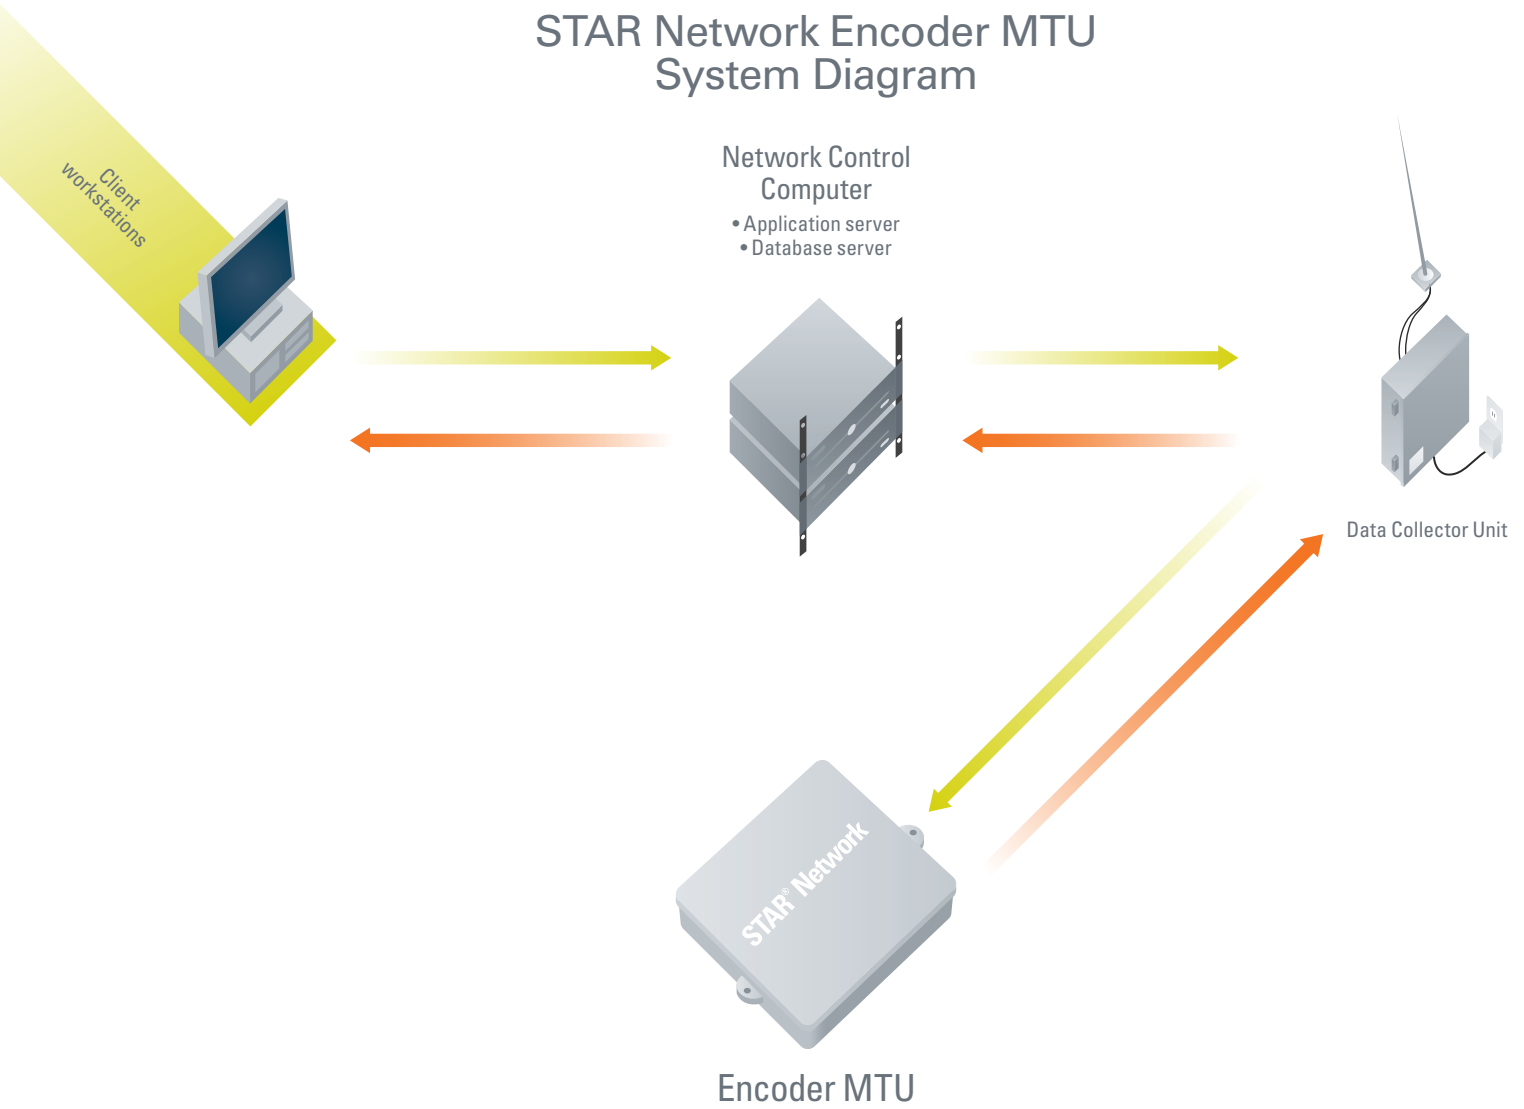

Dual-port operation (optional)

Handles compound meters or multiple-meter installations including gas and water combinations

Additional data

Reports data such as account information, battery condition, and tamper and error status in addition to meter readings

STAR Network Encoder MTU System Diagram

The encoder MTU links the meter to the STAR Network system, capturing valuable data and providing the benefits of reliable AMI.
