ADVANCED METER  
READING TECHNOLOGY  
FOR UTILITIES

“Sensing The Future with Advanced Automatic Meter Reading Systems”

## Call Inbound Meter Reading Reliability

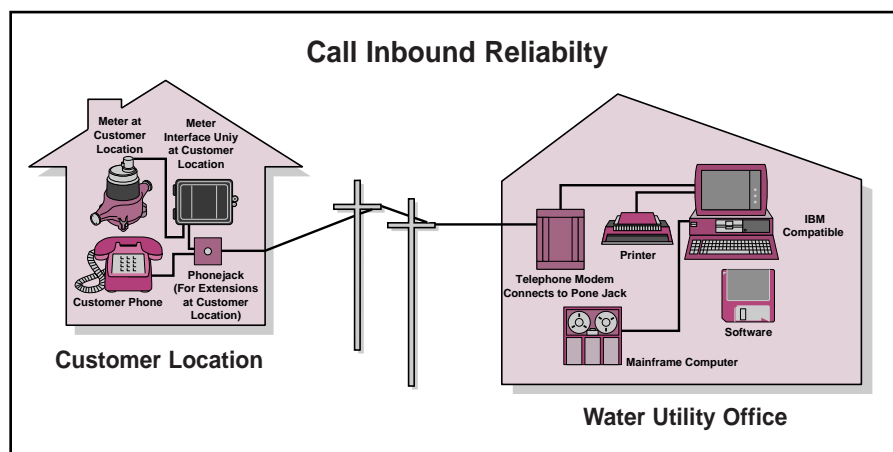

The PhonRead® Call Inbound AMR System offers utilities highly reliable telephone based meter reading without the need for batteries or special equipment to be installed at the telephone company office. PhonRead can make “final reads” or “on demand” meter readings at any time with no assistance required at the customer end and does not interfere with the customer’s telephone service.

### Flexible Features

PhonRead Call Inbound Meter Interface Units (MIUs) can be installed at various locations to immediately focus on special meter reading needs, or throughout the utility’s full distribution system. It provides a variety of features and advantages, including:

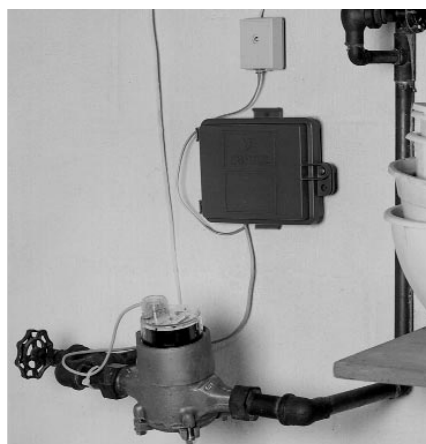

- Battery-free operation for fewer maintenance problems.
- Easy installation - No special equipment needed from the telephone company.
- Instant access reading capabilities for making final reads or to track customer water use.
- Stand alone performance - No partnerships or agreements with the telephone company are required.
- More convenience - Once installed, there is no need to gain access to customer homes for meter readings.
- Adaptable for a variety of needs - Use as a stand alone system or in conjunction with other meter reading methods, such as the TouchRead® System or manual reading.

## PhonRead® Meter Interface Units (MIUs) Eliminate the Need for Batteries

Invensys designed the Call Inbound PhonRead Meter Interface Units (MIUs) to provide dependable service without relying on batteries which would periodically need to be replaced.

The MIUs are programmed to call in to the utility’s computer at pre-determined times to provide customer meter reading data. The system can also make readings on demand, as needed.

### Compatible - Upgradable

PhonRead Meter Interface Units work with the same Electronic Communications Registers (ECR) used for other Invensys AMR systems, making it possible to mix and match meter reading methods to suit a variety of needs and situations.

The Invensys PhonRead Call Inbound System offers utilities a variety of choices and flexibility in building a meter reading system that is right for today...and ready for tomorrow.

For more information, contact your authorized distributor or Invensys representative; or call 1-800-METER-IT (1-800-638-3748).
